American and English Railway Speed. A CLOSE RESEMBLANCE BETWEEN THE SCHE. DULE TIMES ON THE GREAT NORTHERN AND PENNSYLVANIA RAILROADS.

The London Times of June 21-t, in re-

"The last achievement in quick travelling was from Leeds to London by the Great Northern railway in three and three-quarter hours. To the fimid who will be ready ver-gray, and maize. Many velvet gowns to ask if such speed is safe the reply is that the saving of time obtained over the journey in four hours is got rather by reducing the number of stoopages than by actual increase in the rate of travelling. The run from Wakefield to Grantham, a distance of 71 miles, was made in 1h. 21m., and from Grantbam to King's Cross, a distance of 105 miles, in 25.5m. The average speed. The present fashion of wearing the hair including stoppeges, from Leeds to Loncut in a fringe on the forehead is decidedly don, was about 49 miles per hour. The service is the quickest in the world, and the next quickest is the same company's four-hours' train from Leeds to London. Following that the most rapid traveiling in the country is the 'Flying Dutchman,' from London to Exeter, which accomcostumes at Hurlingham had some mixture plashes the distance of 194 miles in 45, 15m.; and then next in order is the 'Wild Irishman, from Euston to Holyhead in 6h. 35m., the distance being 264 miles."

Mr. F. Wolcott Jackson, the general susages to him on card-board, which the reads and answers on card-board the reads and answers on card-bo eighty-one minutes. Now, our regular trains go to Schenck's, which is about the same distance, in 116 minutes, stopping at twenty-one stations. A direct run between the two cities could be made in seventyfive minutes. The London trains are very

comes again fit for breathing. According to Mr. Fleuss, he takes down compressed oxygen to supply the place of that which is breathed. In other words, he has invented a set of anti-lungs, which perform a function precisely the reverse of that of the lungs proper. This was confessed. the lungs proper. This was confessedis a rough, popular, hasty, and generalized explanation. A more scientific account may be expected from the lecture on the subject which Dr. B. W.
